NOTE: This is a list of approved training programs that are generally available locally or within a reasonable commuting distance to persons applying for assistance through the Workforce Innovation and Opportunity Act (WIOA) program. They reflect approved training that is compatible with the Demand and Targeted Occupations List Published by the Central Texas Workforce Board and represent occupations that have the best chance for employment opportunities in the Central Texas workforce area. Other programs of training may be available to you. Our staff can assist you in determining what other training opportunities might be available to you at schools not listed here.

PLEASE TURN PAGE OVER.

IMPORTANT INFORMATION

Workforce Solutions of Central Texas reserves the right to limit or curtail placement of students into individual training providers (schools) or programs of instruction. If the provider or program of instruction of your choosing is not being sponsored at the time you wish to enroll, you may wait until it is open again or consider another program of instruction or another provider of training. Your case manager can advise you on this.

For New Horizons Learning Centers, A=Austin campus; K=Killeen campus

These notes are keyed to the numbers on the front page.

1. This school and its programs are a USDOL Registered Apprenticeship Program. * In addition there are other programs of instruction not listed here that are available through an apprenticeship and which will result in employment while in a learning status with OS2U. Please discuss these with a Case Manager.
2. Many of these programs have an on-line distance education component. For these programs, you must have a home computer that is compatible with the school's website and training modules, a high speed internet connection, and be able to devote the required time to work at home. These programs require personal discipline and family support to work independently without distraction during study and computer time. Contact the school for further information.

All programs are either degree or certificate. Degree programs are usually an Associate. Certificate programs are generally 1 year in length and offer core skills without degree requirements. Most offer the skills required to receive a credential or certification.

There are out-of-area schools not included on this list that offer the same training programs. We can consider them under certain circumstances, however, the cost for schools not on the list may be greater and require you to travel some distance. We generally do not pay costs at schools outside our area that are higher than local schools. Travel and living expenses are not covered by us.
